MaxiDose Food 55-38 TE snap-on

Adding value by valve solutions

MaxiDose Food 55-38 TE snap-on

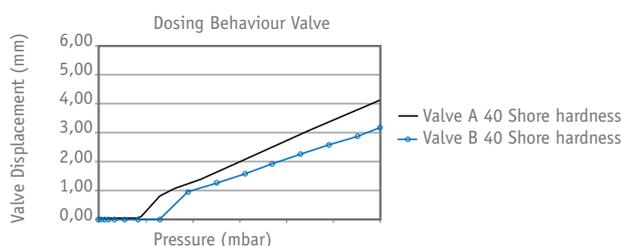

Adding value by valve solutions

Following the latest requirements in the Food industry, Plasticum developed another dispensing closure with tamper evident function, the MaxiDose 55-38 TE snap-on. The anti-tamper strip is broken automatically when the consumer opens the lid for the first time, assuring first use. One of the advantages is, that this closure does not need an aluminium induction seal. No induction machine is required and the closure could even be assembled manually.

The closure fits on bottles with a neck size of 38 snap-on and is perfectly suitable for the dispense of all kinds of sauces and dressings. It can be delivered with and without valve. The valve version includes Plasticum's patented **MaxiDose technology** which ensures a clean and controlled dispense of the quantity that the consumer actually wants.

The lid can be opened and closed conveniently with just one hand thanks to the practical butterfly hinge. With this closure top-down use of the bottle is also feasible, which enables an immediate dispense and makes it easier to dose the last content in the bottle. The closure is made out of polypropylene and has a matt surface finish.

MaxiDose technology

Plasticum developed a proprietary silicone valve solution with a patented technique. The silicone material has a memory for long term seal quality and the opening/closing mechanism. Good temperature resistance is another advantage to give excellent dispensing opportunities for a wide range of viscosities and product applications.

Unique Benefits

- Cost-effective solution
- Continuously controlled dispensing
- Optimised functionality
- Easy to open
- Visual tamper evident function
- No aluminium induction seal required
- Valve and non-valve orifices available
- Suitable for many different viscosities
- Wide array of bottle geometries possible
- Top-down use feasible

Specifications

- Outside dimension: 55.7 mm
- Neck finish: 38 snap-on
- Suitable for PET and PP/PE bottles
- Orifices: 6 mm, 10 mm and valve
- Valve diameter: 11 mm
- Tamper evident function
- Material PP
- Matt surface finish
- Almost infinite range of colours
- Suitable for Food applications
