MaxiDose Oval snap-on 25

Adding value by valve solutions

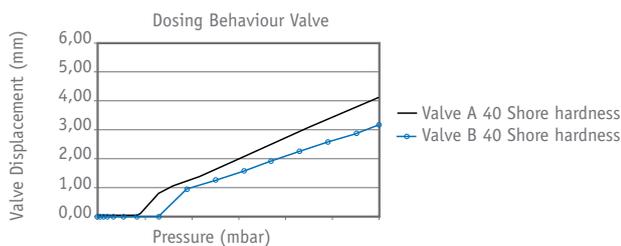

MaxiDose Oval snap-on 25

Adding value by valve solutions

Consumer convenience and optimised functionality were the key challenges for the development of this dispensing closure with valve function. The MaxiDose Oval snap-on 25 offers a fully controlled and clean dispensing. The special design of the valve covers a very wide range of Food applications, such as honey and marmalades, and Personal Care applications, such as creams, gels and lotions. The closure is fitted with the **MaxiDose technology**, a patented valve technique developed by Plasticum.

The closure has a snap-on application. The lid can be opened easily with just one hand. The valve opens gradually whilst squeezing the bottle and offers a fully controlled dispensing. As soon as the pressure is released, the orifice is closed off immediately. No drips. No mess. No clogging. An ever clean orifice is guaranteed!

MaxiDose technology

Plasticum developed a proprietary silicone valve solution with a patented technique. The silicone material has a memory for long term seal quality and the opening/closing mechanism. Good temperature resistance is another advantage to give excellent dispensing opportunities for a wide range of viscosities and product applications.

Unique Benefits

- Cost-effective solution
- Continuously controlled dispensing
- Optimised functionality
- Easy to open
- Valve and non-valve orifices available
- Suitable for many different viscosities
- Wide array of bottle geometries possible
- Top-down use feasible

Specifications

- Neck finish: snap-on 25 mm
- Suitable for PET and PP/PE bottles
- Orifices: 5 mm, 10 mm and valve
- Valve diameter: 11 mm
- Material PP
- High gloss and matt surface finish
- Almost infinite range of colours
- Suitable for Food and Personal Care applications
