Adding value by valve solutions

# MaxiDose Food 42 snap-on

## Adding value by valve solutions

Consumer convenience and optimised functionality were the key challenges for the development of this dispensing closure with valve function. The MaxiDose Food 42 snap-on offers a fully controlled and clean dispensing. The special design of the valve covers a very wide range of Food applications and offers a dispensing solution for almost all varieties of sauces and dressings. The closure is fitted with the **MaxiDose technology**, a patented valve technique developed by WP.

The closure has a snap-on application and tamper evident function. The tear-off strip can be easily removed before first use. The valve opens gradually whilst squeezing the bottle and offers a fully controlled dispensing. As soon as the pressure is released, the orifice is closed off immediately. No drips. No mess. No clogging. An ever clean orifice is guaranteed!

### MaxiDose technology

WP developed a proprietary silicone valve solution with a patented technique. The silicone material has a memory for long term seal quality and the opening/closing mechanism. Good temperature resistance is another advantage to give excellent dispensing opportunities for a wide range of viscosities and product applications.

### Unique Benefits

- Cost-effective solution
- Continuously controlled dispensing
- Optimised functionality
- Easy to open
- Visual tamper evident function
- Valve and non-valve orifices available
- Suitable for many different viscosities
- Wide array of bottle geometries possible
- Top-down use feasible

### Specifications

- Outside dimension: 41.6 mm
- Neck finish: 39 mm snap-on
- Suitable for PET and PP/PE bottles
- Orifices:
  - For PET bottles: valve
  - For PP/PE bottles: 4 mm and valve
- Valve diameter: 11 mm
- Tamper evident function
- Material PP
- High gloss surface finish
- Almost infinite range of colours
- Suitable for Food applications
